

Habitat Management (CSP Enhancements)
Colorado Enhancement Activity Job Sheet H-1

February 2005

Name:

Retain Tall Stubble Through Winter Using a Stripper Header

Payment = \$3.00 / Acre / Year for each acre where a stripper header is used to harvest grain. Post-harvest grain stubble will be 15" or taller. Stubble will be not be tilled until after July 1st, but during this time weeds will be adequately controlled through spraying or biological agents. If a spring crop is planned, it must be no-tilled into the existing cover.

This enhancement provides food, escape cover, day and night roost sites, and nesting sites for a number of wildlife species ([list local species that will benefit](#)).

Documentation Required: Use the following Table for documentation. Attach a plan map showing the field numbers where the stripper header will be used.

Tract & Field Numbers	Target Species	Type of Grain	Stubble Height After Harvest	Date of First Tillage

Stripper Header Certification

I certify that I am using a stripper header as explained above.

Name: _____ **Date:** _____
